

DADE, 1647.

A New Almanack and
Prognostication : with the
Sun rising and setting for the first
and middle of every Month ;
with the signs & quarters
of the Moone.

Also, the age of the Moon, against
every day of the Month.

In which you may behold the state of
this year 1647.

For the Meridian of *London*, and
may serve for the most part of
Great Britaine.

Being the third after Leap Year.

By WILLIAM DADE Gen.

LONDON,
Printed by *Richard Bishop* for the
Company of Stationers.

A Note of the Moveable Feasts for this present yeare 1647.

A briefe description of the foure
Quarters of the yeare, wherein is de-
clared the quality and disposition of each
severall SEASON.

And first of Winter.

Q. In W. m. X.

According to the ancient *Astronomers* and
our English account, Winter was no-
minated for the first Quarter of the yeare;
which Winter Quarter began upon Friday
the 11. of December the last year 1646. when
the Sun had finished his course through these
three Autumnall Signes, *Libra*, *Scorpio*, and
Sagittary, and then he entereth into the first
minute of *Capricorne*; The Sun then making
with us the Winter *Solstice*, it being then the
shortest day and longest night in the whole
yeare, by reason of the Sun greatest declina-
tion from the *Equinoctiall* Line toward the
South-pole: which Winter quarter continu-
eth unill Wednesday the tenth of *March*
this year 1647. The usuall and naturall con-
dition of this season, is known to be cold and
moist, and opposite to the Summer.

Touching the temperature, state, and alte-
ration of the weather, it is explained by the
daily disposition in each severall month fol-
lowing.

B.

The

The Diseases usually accompanying this Quarter, are, Convulsions, Cramps, Goutches, Aches, Stitches, Stricures, Paine in the Bones and Joyntes, Catarrhs, Paine of the Head and Teeth, Collicke, and such like.

Of the second Quarter of the yeare,
called the **Spring**.

in **Y. 8. II.**

THE Sun having fully finished the Winter Quarter, with the last part of *Pisces*, be-
ginneeth the second part of this yeare, (which
is the pleasant Spring,) upon Wednesday the
tenth of *March*, at which time the Sunne en-
tereth into the first minute of *Aries*, which is
the first, *Equinoctiall*, Signe, causing the dayes
and nights to bee equall through the whole
world; and this Quarter doth continue untill
Friday the eleventh of June next ensuing.

The naturall quality of this Quarter (above
the rest) is the most pleasant and temperate, it
being the fittest time to helpe such diseases
which by the disemperature of other Seasons
were ingendered in our bodies. As for the al-
teration of the weather, it may be partly seen
in the daily disposition of each month.

The Griefes of this Season, are these, or
thelike, as namely, Plurisies, sudden swellings,
Fixes of divers sorts, Scabs, ach in the Joynts,
paine

paine in the Head and Eyes, Obstructions of
the Lungs, Fevers, Agues, with others.

Of the third Quarter of the Yeare, called

S U M M E R.

○ in S. N. m.

THe third part of the yeare Astronomical,
called the Summer Quarter, taken
beginning at the Suns departure from the last
degree of *Cancer*, into the beginning of *Libra*,
at which time he is nearest to our Vertical
point, making his greatest declination toward
the North-pole from the Equinoctiall, causing
the Summer Solstice, and the longest day and
shortest night in the year, which will be upon
Friday the eleventh of *June*, and continueth
till Sunday the twelfth of *September*.

Now cannot the Stomacke of man digest
such hard and coarle food as in the Winter
season, because naturall heat is distributed
unto the exterior parts of the body, and the
stomack is more cold and weak.

The Diseases generall of this Quarter (by
reason of its heate and drynesse, yare some of
those that reigned before in the Spring, with
burning Fevers, Vomiting, Plagues, Scabs, un-
natural Swearings, Bleeding, Dropies, short-
nesse of breath, griping of the Stomack, with
sharpe Diseases among children.

And as for the disposition of the Weather,
you may observe it in the daily inclination.

Of the fourth quarter of the year,
called *Autumn*, or the fall of the *Leafe*.

☉. in ♌, ♍, ♎, ♏.

A *Uturne*, or Harvest, (the fourth and last
Quarter of the year with the ancient A-
stronomers,) most profitable for Corne and
Fruite. This Season beginneth at the time of
the Suns entrance into the first degree of *Li-
bra*, which is upon Sunday the twelfth of *Sep-
tember*, making the second Equinoctiall, when
the daies and nights are of equal length again,
as in the Spring. And this Quarter endeth up-
on Saturday the eleventh of *December*.

The disposition of this Season is unconstant
and variable, by meanes whereof it is the mo-
ther and nurie of most diseases and sicknesses.
As for the Weather, you may see in the daily
disposition of each month.

The Sickneses and Diseases of this Quar-
ter, most doubtfull to afflict our mortall bo-
dies, are many and dangerous, as Quartaine
Agues, Obstructions, the Spleen, Piles and
Hemorrhoids, Shortnesse of breath, Consump-
tions, paine in the Head, Gout, Droplics,
Stranguries, Sciatica, Tooth-ach, and others.

Certain

Certain short Verses, or Physicall Rules over every Month:
 with the New, Full, and Quarters
 of the Moon for each Month.

Also, the Ordinary judgement of
 the weather, for each day through the
 yeare: with Husbandry Instructions,
 for each Month of the same.

And first for January.

If thou be sick, and helpe wouldst have,
 The counsell of the Learned crave;
 If thou hast health, to keepe thee so,
 Fly sloath as a most deadly foe.

The first and second daies wet.

The iii. faire.

The first Quarter on Monday the iiii. day, about
 ii. of the clock in the morning.

The v. and vi. frost.

The vii. windy.

The viii. and ix. foggy or frost.

full Moon on Thursday the x. day, (being C,
 clipped)

The first day from
first quarter on Tuesday the second day,
three quarters of an hour past three in
the afternoon.

The 2, 3, and 4, winds.

The 5, and 6, winds.

The 7, and 8, winds.
Full moon on Wednesday the 9, day, at 9 of the
clock in the morning.

The 9, 10, and 11, winds.

The 12, and 13, winds.

The 14, and 15, winds.

Full moon on Thursday the 16, day, at 9 of the
clock in the morning.

The 16, 17, and 18, winds.

The 19, and 20, winds.

The 21, 22, and 23, winds.
New moon on Friday the 24, day, at
one of the clock in the morning.

The 24, and 25, winds.

The 26, 27, and 28, winds.

February 1, 1647.

This Month let Notes, with all other kind
of plants cut Quick-sets, for Pearls and
others as in the Month before (the month
considered;) you may now get on for small
beards, and such like.

A Prognostication

Of March.

Now Bleed and Bath if thou desire,
And Purge likewise, if need require;
Ill Humours doe in many breed,
Provide in time before thou need.

The first, 2. and 3. daies windy.

First quarter on Thursday the 4. day, 3. quarters of an houre past one of the clock in the morning.

The 4. and 5. wet.

The 6. and 7. faire.

The 8. and 9. frost.

Full Moon on Wednesday the 10. day about 12 of the clock in the evening.

The 10. and 11. windy.

The 12. 13. and 14. wet.

The 15. 16. and 17. faire.

Half quarter on Thursday the 18. day about 6. of the clock in the evening.

The 18. and 19. frost.

The 20. 21. and 22. windy.

The 23. 24. and 25. faire.

Full Moon on Friday the 26. day, about 11 of the clock in the morning.

The 26. and 27. faire.

The 28. and 29. windy.

The 30. and 31. wet.

Matches

Date 1647. A

Marches Instructions;

This month (in the new of the Moone)
Graft, set Quick-sets and Vines, and cut your
Wedges already growing; Also you may sow
Onion, Beanes and Oates, and most manner
of Garden Seeds.

Of April.

Now wholesome Baches thou mayst frequent;
Let Blood, if reason give consent;
These are good meanes thee to defend
From Canker that doe on thee attend.

The first day wet.

The first quarter on Friday the second day, a
quarter of an houre past nine of the clocke
in the morning.

The 2. 3. and 4. faire.

The 5. and 6. cloudy.

The 7. and 8. windy.

Full moon on Friday the 9. day, past 4. of
the clocke in the morning.

The 9. and 10. wet.

The 11. 12. and 13. faire.

The 14. and 15. cloudy.

Half quarter on Friday the 16. day, 3 quarters
of an houre past 8. of the clock at night.
